PROFILE

Enthusiastic frontend developer proficient in HTML, CSS, and JavaScript, with a keen focus on crafting engaging user experiences. Experienced in React and adept at building responsive applications. Eager to contribute to dynamic teams and continue growing as a developer in a frontend role.

PROJECTS

Wild Oasis

Live Link - <https://grand-wild-oasis.netlify.app> 

GitHub Link - <https://github.com/PraveenMahra/wild-oasis> 

I did the development of a Cabin Booking Admin Dashboard application leveraging cutting-edge technologies to streamline cabin management processes

The application, designed with **React, React Query, and Styled Component**, offers an intuitive interface for efficient cabin booking management.

Key points

- Employed Styled Component to expedite UI development and ensure consistency in design across the application, enhancing user experience and visual appeal.
- Integrated React Query for efficient data fetching, caching, and synchronization with the backend, optimizing application performance and responsiveness.
- Did the storage of data into a **Postgre SQL** type database using **Supabase** and their **APIs**.

Pizza ordering

Live Link - <https://pizzas-app-react.netlify.app> 

GitHub Link - https://github.com/PraveenMahra/pizza_ordering_app_react 

- Pizza ordering is a comprehensive multi-page website project that I developed using **React, React Hooks and Tailwind CSS**.
- This application allows to order pizzas by adding them to **cart** and having **checkout**, also the ability to track the orders using order id is available.
- Throughout the development process, I focused on creating a seamless user experience by prioritizing **responsiveness** and **performance**.
- This project exemplifies my ability to conceptualize, design, and implement functional web applications that meet the needs of modern users.

Time for Tea

Live Link - <https://praveen-ecommerce.netlify.app> 

GitHub Link - <https://github.com/PraveenMahra/e-commerce-website> 

- Project built with HTML, CSS and JavaScript.
- **Data manipulation** with javascript to create interactive application.
- **CI/CD** and deployment with netlify.
- Using git and github to handle version control
